

LIMITED LIFETIME WARRANTY

red eye®  
BEARING PROTECTORS

KODIAK TRAILER COMPONENTS warrants the RED EYE® BEARING PROTECTORS against defects in material, parts, workmanship, and guarantees O-ring seals not to leak grease for as long as the original purchaser owns the trailer described on the Warranty Card. Kodiak also agrees to repair or replace any defective unit without charge, subject to timely receipt by KODIAK of the attached warranty information card, properly completed.

**IMPORTANT:** The warranty does not cover damage resulting from accident, misuse or abuse, lack of reasonable care, the affixing of any attachment not provided with the product, loss of parts, or subjecting the product to any but the specified application.

**NO RESPONSIBILITY IS ASSUMED FOR ANY SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES.**

You may obtain warranty service by taking or shipping the unit postage prepaid to KODIAK at the address listed below. Loss or damage occurring during transit is not covered by this warranty.

**NOTE:** No other warranty, written or oral, is authorized by KODIAK.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion and limitation may not apply to you.

## INSTALLATION INSTRUCTIONS

**Before Installing:** Align Red Eye® Bearing Protector with hub. Using a rubber mallet drive your Red Eye® into place. Complete installation by tapping around outer edge (avoid hitting grease fitting as it may extend during installation).

## FILLING INSTRUCTIONS

Fill **ONLY** with a hand grease gun. Add wheel bearing grease through the grease fitting until the "FULL" MARK (ORANGE O-RING) is visible. (NOTE: FULL TRAVEL APPROXIMATELY 1/4"). Wipe away all excess grease.

**CAUTION: Do not overfill! Adding grease after red "FULL" mark is visible may result in damage to seals. Adding grease with a power gun WILL damage seals!**

## LUBRICANT LEVEL CHECK

Visually check periodically to assure indicator rod is still extended. When indicator rod (red washer) is touching the housing it is time to add grease.

## RECOMMENDED LUBRICANT

A good quality water repellent marine wheel bearing grease\* is recommended.

**NOTE:** A Red Eye®  $\text{R} \circ \text{R} \circ$  indicator that repeatedly recedes to a flush position may indicate an inner seal failure which should be investigated immediately. "Double lipped" inner seals are recommended.

\*Grease consists of oil, soap and additives. (The soap in any particular grease has one of several chemical bases: lithium, calcium, etc.). Oil sometimes separates from the soap and may leak out of the Bearing Protector or under the rear seal. This is normal and won't create any problems.
